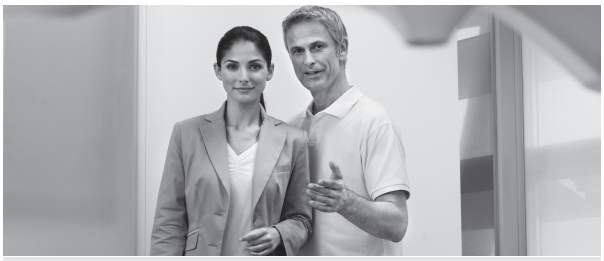
Proven by over 1.5 million eyes
Trusted by over 1,700 surgeons
ZEISS ReLEx SMILE

SMILE – is an advanced technique and standard in Laser Vision Correction. Precise and virtually pain-free, with ReLEx® SMILE® performed on a VisuMax® from ZEISS lets you treat patients with myopia, astigmatism and even those with presbyopic conditions. It is a beneficial option that goes beyond PRK and LASIK, requiring only one laser and a small incision making it attractive for patients and surgeons alike.

SMILE benefits at a glance

...for you

- Performed on one laser – the VisuMax femtosecond laser
- No flap-related complications
- Excellent predictability – low percentage of retreatments
- Short learning curve for Femto-LASIK users
- Short treatment times with VisuMax femtosecond laser – possibility of a higher patient volume per surgery day
- Easy post-operative management



...for your patients

- Minimally invasive Laser Vision Correction procedure
- Great integrity of the upper corneal layers
- Potential for preserving biomechanical stability
- Reduces epithelial ingrowth
- Option for patients with dry eye tendency
- Low risk of infection and generally fast healing
- Gentle, comfortable, stress-free patient experience
- Odor- & noiseless

One platform for a broad Laser Vision Correction portfolio
When the VisuMax® femtosecond laser is combined with MEL® 90 excimer laser from ZEISS, the result is a premier platform for all major Laser Vision Correction procedures – PRK, LASIK and SMILE. Refractive clinics can offer patients customized treatments, while clinics can achieve more success in competitive environments.
