

**New: Duralyt Riflescopes with illuminated reticle**

We make it visible.

# New ZEISS Products in 2011

## Duralyt now available with illuminated reticle

Premium target optics for active hunting

1.2-5x36

2-8x42

3-12x50

The entry level class from Carl Zeiss is comprised of three variable riflescopes. They feature a distinct design and an outstanding price-performance ratio.

Uncompromising ruggedness, accuracy in optics and mechanics, and sustainable functionality provide the foundation for successful targeting and reliable shots.

Duralyt guarantees outstanding image quality with bright, highly detailed images – unusual for this class.

The Duralyt line offers active hunters, young hunters and professional hunters three models with and without an illuminated reticle: 1.2-5x36, 2-8x42 and 3-12x50.

Made in Germany.

## Illuminated Reticle 60

More flexibility for Duralyt Riflescopes

The extremely fine, daylight-capable illuminated dot can be activated when needed and impresses with its high light intensity. It can be continuously dimmed, making it ideal for any hunting situation. Its positioning in the second image plane ensures minimal subtension – only 0.8 cm at 100 m with 12x magnification!
