

Completing the Planetarium Experience

Planetarium show in the experimenta Science Dome in Heilbronn | Photo courtesy: V. Schorcht

An enjoyable planetarium experience also includes good sound. The technical spectrum ranges from stereo to perfect 3D surround sound. Also, the light needs to be effectively staged. Whether spot or multispectral dome

lighting, light and laser effects are attractive components of a successful planetarium event. Last but not least, modern planetariums are equipped with microphone systems, induction loops for the hearing impaired, and captioning technology.
