

Distagon T* 4/40 ZH

The Super Sharp Super Wide

The Sinaron Digital AF Distagon T* 4/40 ZH is a sophisticated super wide angle lens, giving outstanding performance to the edges of the field. Experts consider it the best wide angle lens available for medium format digital photography. Sharpness is unusually high at all apertures and over the entire distance range from infinity to the close focus limit. Similarly, illumination across the frame is remarkably even, color reproduction is vivid and flare is very well controlled.

Technical Specifications

Focal Length: 40 mm

Aperture range: 4–22

No. of elements/groups: 12/9

Focusing range: 0.5 m – infinity

Image ratio at close range: 1:8.3

Coverage at close range: 30 cm x 41 cm

Angular field, diag./horiz./vert.: 73/61/48°

Filter: M 86 x 1

Weight: 1220 g

Length: 126 mm

Distagon T* 4/40 ZH

Performance data

The Modulation Transfer T as a function of image height and slit orientation (sagittal, tangential) has been measured with white light at spatial frequencies of R = 10, 20 and 40 cycles/mm.

T (%), f-number: k = 4

E (%), Relative illuminance

T (%), f-number: k = 8

Distortion in % of image height u
